

PROJECT OVERVIEW

DOOSAN CRANE DELIVERY

THE PROJECT:

Transported two Rail Mounted Quay Cranes from Masan, South Korea to Military Ocean Terminal, Sunny Point, North Carolina. Foss provided marine transportation services for Dongbang Transport Logistics Co. and Doosan Heavy Industries in support of US military operations at one of their primary east coast deep-water ports. The ocean voyage covered 10,834 nautical miles through hazardous weather conditions, and was successfully completed on schedule without incident.

SERVICES PROVIDED:

- Turnkey Ocean Towing
- Project Cargo & Logistics
- Marine Engineering
- Construction Support
- Ballasting and Mooring
- US Flag and Preference Cargo

HIGHLIGHTS:

- Completed the 10,834 nautical mile journey in 71 days, and despite encountering three separate cyclones, delivered the cargo in good condition, on time, and on budget
- Transported two large Container Handling Rail Mounted Quayside Cranes, totalling 1,900 metric tons each
- Worked in a collaborative effort with Dongbang Transport Logistics Company and Doosan Heavy Industries, both based in South Korea
- Designed and provided ballasting and mooring solutions in both South Korea and North Carolina, using both Foss Maritime management and ballasting crews at both ports
